

Coronavirus

Getting tested

There is now a coronavirus test for

- * **NHS and care workers**
- * **Care home residents**
- * **Essential workers**
- * **People 65 or older**

Testing sites

These tests are done in a pod or sat in the car. NHS staff swab your throat and nose.

Does it hurt?

The first swab touches the back of your throat. It can make you gag.

The second swab goes right up the nose and is twirled around. This may feel strange.

Test at home

Carers can help swab your throat and nose in your own home.

How to get tested

You may be told to get tested or you can book a test on the Government's website.

bit.ly/coronavirus-test-uk

Results

The swabs go to a lab. You will get your results in about 3 days.
